"We don't just build websites, we build systems that generate sales."

PREPARED FOR

Lajwanti Uniform

Target: School & Workwear Digital Store

SUBMITTED BY

Tousif Raza

Founder & Technical Architect, MakerlyAI

MakerlyAI.in

ABOUT MAKERLYAI

High-Conversion Digital Engineering & Automation

MakerlyAI is a premier software development studio founded by **Tousif Raza**. We specialize in building robust e-commerce platforms, customer automation, and business-first web engines. We believe a website shouldn't just be an online brochure—it must function as an automated 24/7 sales engine that saves time, simplifies order management, and directly increases commercial revenue.

**Fast Execution**

Working prototypes within 7 to 10 days so your business starts receiving customer traction quickly without months of delay.

**Modern, Clean UI**

Premium, clutter-free aesthetics tailored for Indian parents and institutional clients shopping on smartphones.

**Sales-Driven Approach**

Every button, product card, and 1-click WhatsApp order trigger is engineered to convert casual visitors into paying customers.

UNDERSTANDING YOUR BUSINESS

Lajwanti Uniform: Unlocking Modern Retail & Bulk Orders

Lajwanti Uniform is an established supplier of school uniforms, institutional attire, and workwear. Currently, uniform procurement often relies on manual inquiries, seasonal in-store crowding, phone calls, and localized word-of-mouth. Having a dedicated, modern e-commerce storefront transforms this experience for parents, schools, and corporate buyers.

**Seamless Customer Browsing**

Parents and school administrators can effortlessly filter uniforms by institution, grade, gender, and size from their phones without standing in long shop lines.

**Reach Beyond Local Physical Limits**

Expand your market across town, neighboring cities, and regional institutions. Anyone searching for your school uniform sets will find you instantly on Google.

**24/7 Order & Inquiry Intake**

Collect orders day and night. Customers can pay online or initiate instant WhatsApp orders with full SKU details pre-filled directly into your chat.

**Unmatched Brand Trust & Authority**

A fast, beautifully branded website instantly signals reliability and high quality when pitching to new schools, colleges, and corporate accounts.

WHAT WE WILL BUILD

Complete E-commerce Engine (Built for Simplicity)

We handle the complete technical architecture from start to finish. Everything is designed in non-technical, simple terms so your staff can run the store with zero coding experience.

1. High-Impact Homepage Brand Showcase

A modern, welcoming storefront showcasing school partners, trending uniforms, featured collections, quality assurances, and trust badges.

2. Organized Product Catalog Categorized

Clean category trees: School Uniforms, Sports Wear, Accessories (Belts/Ties/Socks), Winter wear, and Corporate gear with instant filter and search.

3. Product Detail & Sizing Pages Clarity

Rich photo galleries, fabric specifications, interactive size selector chart (helps parents pick the exact fit), and stock availability indicators.

4. Add-to-Cart & Express Checkout Frictionless

Clean shopping bag summary where parents can buy multiple items (e.g. 2 shirts + 1 skirt + 1 tie) in one streamlined single-page order form.

5. WhatsApp 1-Click Order Intake High Conversion

Direct WhatsApp checkout. Customers click one button, and an automated message with their selected items, sizes, and address is sent straight to your phone!

6. Online Payment Gateway (Optional) Secure

Support for UPI, Google Pay, PhonePe, Paytm, Debit/Credit Cards, or Cash-on-Delivery (COD), depositing funds directly into your bank account.

7. 100% Mobile-First Responsive Smartphone Optimized

Over 85% of shoppers use smartphones. Your store will load in under 2 seconds on 4G/5G networks across iPhone and Android devices.

8. Simple Business Admin Dashboard Zero Code

A user-friendly control panel where you or your staff can add new products, update prices, upload photos, and track incoming orders in 2 clicks.

Special Advantage: The WhatsApp Hybrid Ordering System

In India, many parents prefer ordering or confirming questions on WhatsApp before paying. Our hybrid architecture gives them both: direct online checkout OR immediate 1-click WhatsApp order confirmation.

OUR PROVEN 6-STEP WORKFLOW

How Everything Will Work (Step-by-Step)

We make the entire journey effortless for you. You don't need any technical knowledge—we guide you through every step with total transparency.

1 Requirement & Catalog Discussion

We review your product list, uniform categories (which schools/workplaces), pricing structure, size variations, and brand color preferences.

2 Design & Storefront Layout Setup

We construct a polished, modern visual layout tailored specifically for Lajwanti Uniform, ensuring your logo, banners, and categories look clean and attractive.

3 Development & Product Integration

We program the e-commerce functionality, upload your initial products, connect the shopping cart, and configure the automated WhatsApp order bridge.

4 Rigorous Quality & Device Testing

We test every page across multiple Android and Apple devices, simulate test orders, check loading speed, and ensure size selectors work without glitch.

5 Official Deployment & Going Live

We link your custom domain (e.g. lajwantiuniform.com), connect security SSL certificates, submit your store to Google Search, and launch live.

6 Continuous Support & Maintenance

Our commitment doesn't stop at launch. We provide ongoing maintenance, price edits, technical monitoring, and phone/WhatsApp support.
